

HOW CLEANSHIELD WORKS

What happens when I take Cleanshield™?

- Boost pH levels in the body
- Higher pH stimulates the immune system
- Immune system attacks invading disease conditions

A wide range of degenerative diseases thrive in an acidic (unbalanced pH) environment. Eliminate the unbalanced condition with Cleanshield™.

- Launch your fight for acid – alkaline balance with Cleanshield™
- Cleanshield™ is the fastest and simplest way to boost alkalinity
- Body metabolic processes perform at best levels
- Trigger response of the immune system
- Experience the body's powerful ability to fight disease

What is Cleanshield?

- Special blend of all-natural minerals in water
- pH level of 11.0 – 11.3
- Designed to stimulate production of alkalinity buffers

This safe-to-use high pH blend of minerals has a pH range slightly higher than 11.0 that demonstrates the ability to boost body pH level fast.

How Does Cleanshield Work?

When Cleanshield™ is ingested, it dramatically dilutes the acid in the stomach, triggering the body's mechanism for producing more acid. This process also results in a corresponding equal production of alkalinity within the body.

- Trigger body's own production of alkalinity
- Neutralize areas of excessive acidity
- Balanced pH levels stimulate immune system
- Immune system more effectively fights all disease conditions

The result of this Cleanshield™ newly produced alkalinity; a powerful dynamic for healing is created. A properly pH-balanced body enables the immune system to effectively combat toxins, diseases, parasites and other harmful foreign invasions in order to maintain a healthy system. No known harmful pathogens can survive in the human body with a pH near 7.0.
